QwickTies™

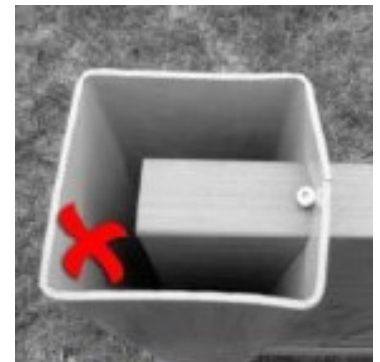

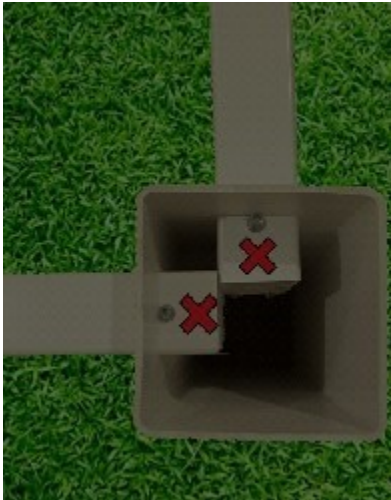

“For A Professional Install”

Distributed by:

The Problem

- Keeper screws put too much stress is on a single point of the post
- Wears against the post over time
- Can cause the vinyl post to possibly crack
- Increased warranty work and call backs
- Weaker overall fence system

The Solution

- Distributes any stresses around the post instead of one single point
- No wearing against sides of post
- Secures and connects the top rails inside the vinyl post
- Increases the strength of the entire fence system
- Less call backs and happier customers
- Provides a complete and professional job
- Build a stronger fence than your competitors
