STEEL FENCE

FENCES THAT ARE BUILT TO LAST

Our ornamental steel fence panels come in three different popular styles. It is manufactured from galvanized steel tubes to prevent rusting. Also, the steel is preassembled and treated with a multi-layer barrier of the powder coating process for supreme anti-corrosion and weather-resistant performance.

PRODUCT FEATURES

True Guard™ Protection System

- To prevent rusting from base material, all of our products are galvanized and have a Zinc Mass of 180g inside and out.
- To ensure superior adhesion, each of our products undergo seven stages of pre-treatment with zinc-rich phosphate.
- To cover all welds and cut edges, zinc-rich epoxy primer powder coating is applied to all our products.
- To achieve exceptional anti-corrosion and weather-resistant performance, polyester finish powder coating is administered to our products.

RACKABLE PANELS

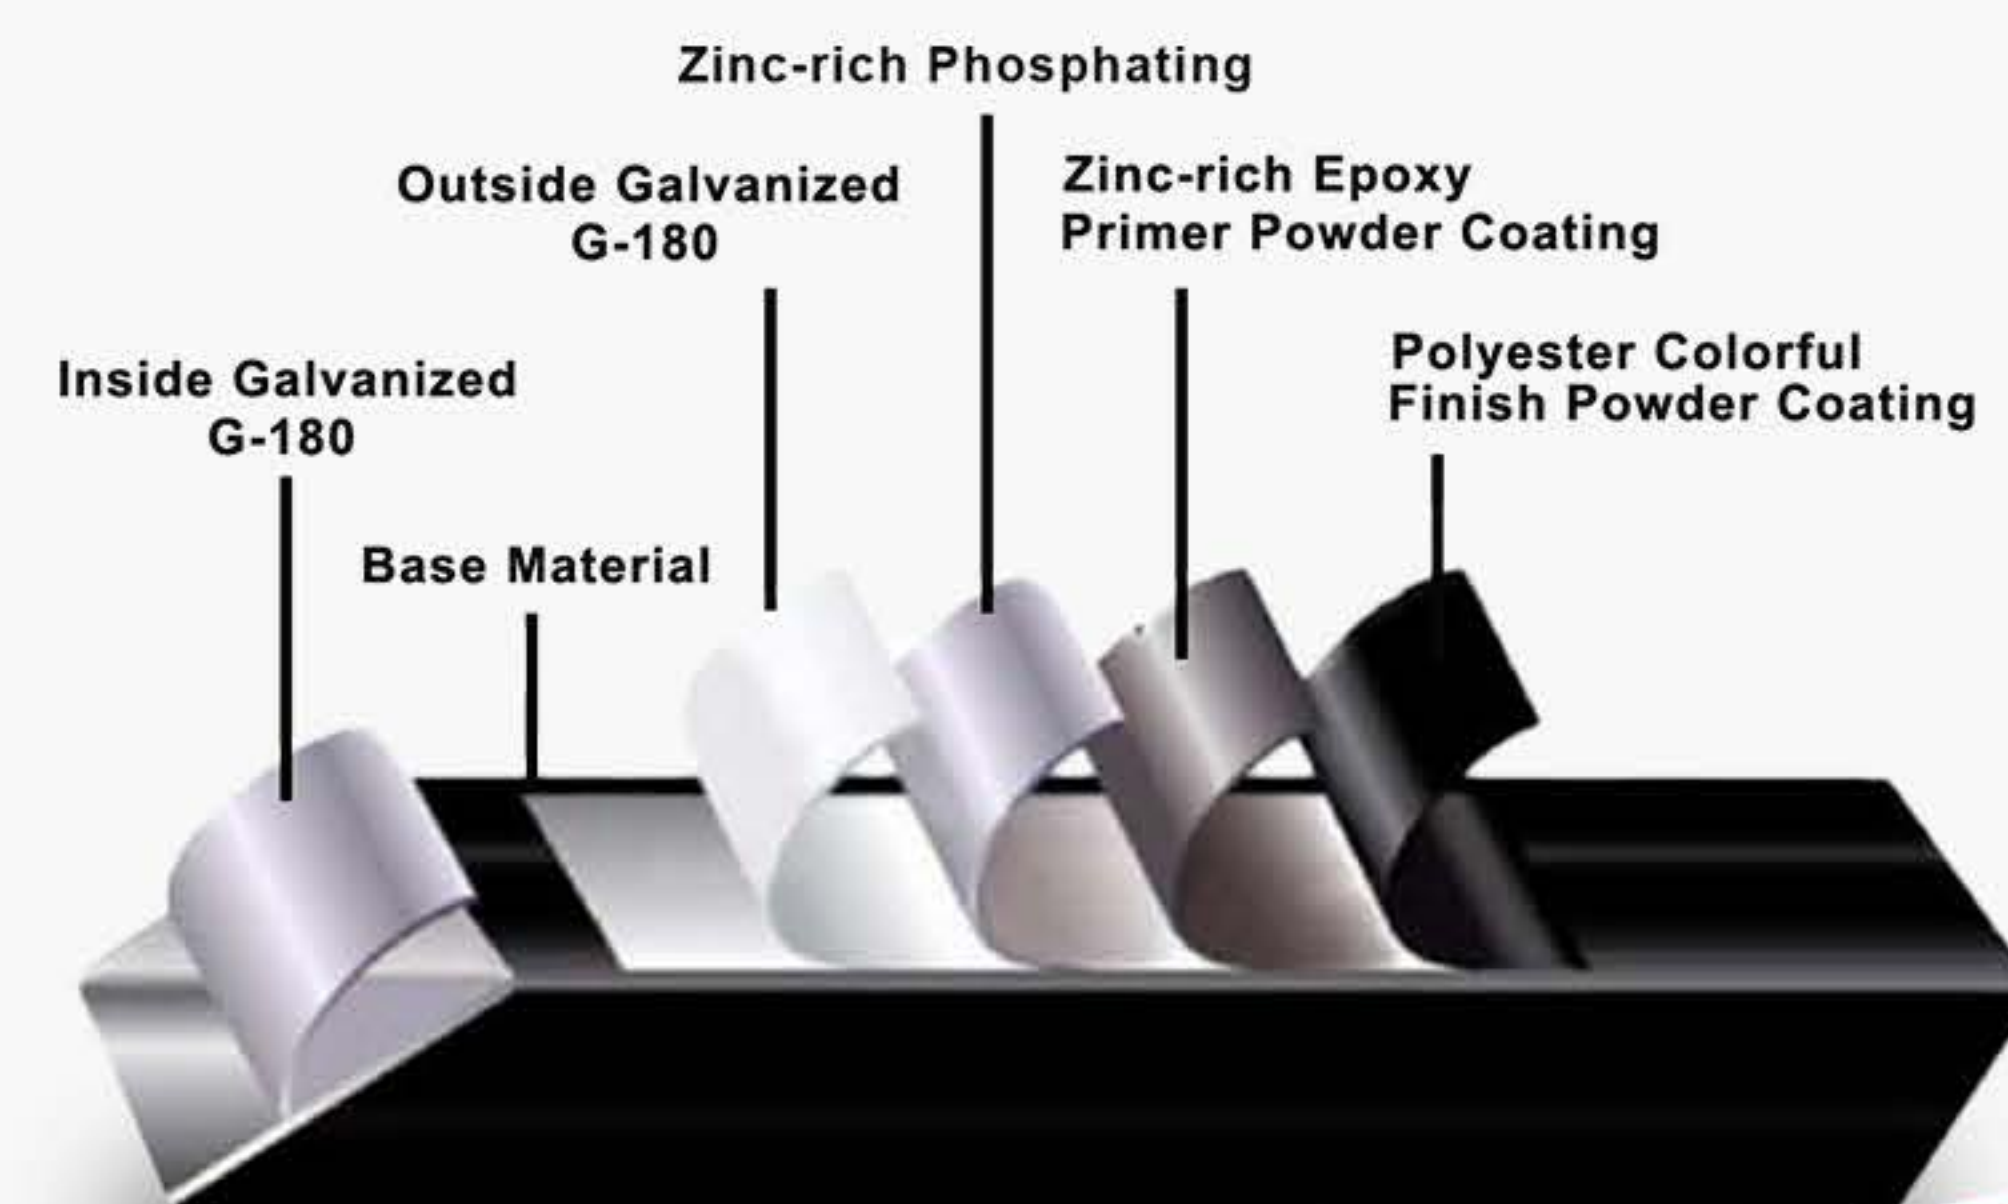

All Malden Metals ornamental steel fencing is fully rackable up to 40 degrees. This will help your fence flow even in the largest sloped landscapes.

STEEL GATES

STEEL WALK GATES

Malden Metals steel walk gates are welded at all intersections. The solid, sleek design will flow from fence to gate and are built for Canada's unpredictable weather.

TRUE GUARD™ - 7 STAGES OF PROTECTION

Corrosion is major problem in ornamental steel fences. Malden Metals steel walk gates are pre-galvanized to prevent rusting and corrosion. The gates also go through 7 stages of pre-treatment with zinc-rich phosphate. All welds are powder coated in zinc-rich epoxy primer as well as a polyester finish powder coating. Malden Metals takes corrosion and weather resistance very seriously and as so takes these additional steps to make sure your fence is strong and durable.

PRE-FABBED WALK GATES

* Custom Heights and Sizes Available With Special Order Fabrication *

- ▶ Gates come in widths of 36" and 46"
- ▶ Gate heights are 44", 56" and 68"

QwickTies™

WHAT DO THE QWICKTIES™ DO?

- Replaces rail notching or keeper screws.
- Distributes undue stress from the top rail to the strongest part of the post.
- Eliminates post failures at the routed holes from incorrect stressing.

WHAT CAN THE QWICKTIES™ DO FOR YOU?

- When you install your fence the bottom rail will not come out because it is held secure between the pipe. The upper rail still needs to be secured and QwickTies™ fix this problem for you.
- QwickTies™ eliminate the need for notching which takes time and makes for very difficult disassembly if ever required, especially in cool climates.
- Adds a professional finish to the top rail adjustments.

Our QwickTies™ allow you to install vinyl fence without causing undue stress on the post by securely fastening the top rail within a PVC post.

QWICKCOLLARS™

Qwick Collars are simply the best post-to-pipe pole levelling system on the market today. Our Qwick Collars allow you to install your steel posts without using concrete.

SOME FACTS

- Stronger one-piece design
- Maximum adjustability—slot extends to outer diameter
- Quicker and more accurate than two-piece design
- Flexible enough to fit over slightly “mushroomed” pipe
- Internal ridge keeps it from sliding during installation
- Easy to repair the fence and replace the posts since they are not concreted into the ground
- Cleaner—no left over dirt tailings after post installation. Save money on labour, concrete the expense to agar holes and remove the dirt tailings.
- Quicker install, no need to wait for concrete to set and hope your posts do not move as the concrete dries.

Your customers will be pleased with a clean, damage-free installation—without the need of a skid steer, auger or concrete mixer. You will save money on vinyl because the PVC post length stays above grade—a six-foot fence requires only a six-foot PVC post. Our Qwick Collars have been proven in some of the harshest climates and most difficult soil conditions in Canada.
